

Air Line Filter 1/4" & 3/8" NPT

Features

- Removes foreign particles from contaminated air supplies
- In-line Installation
- Portable and lightweight

Application

The Air Line Filter is the solution when compressed air containing impurities cause improper operation of equipment, decreased tool life, and eventually (in some cases) equipment failure.

Operation

The Air Line Filter can be attached directly to pneumatic air tools. The filter contains a large, porous bronze element to remove foreign particles from contaminated air supplies. The user is assured a cleaner supply of air to operate equipment and extended intervals between cleaning.

Materials of Construction

Body Anodized Aluminum

Filter Element 40 micron Bronze

Specifications

Port Threads ... Inlet: 1/4" FNPT / Outlet: 1/4" NPT

Inlet: 3/8" FNPT / Outlet: 3/8" NPT

Ordering Information

Port Size: 1/4" **Part No:** 600250

Port Size: 3/8" **Part No:** 600375
