

Sand Filter 1/4" or 3/8" NPT

Features

- Eliminates the ingestion of sand, dirt, and debris from the air source.
- A simple solution to avoid a potential problem
- Small and lightweight

Application

The Sand Filter provides protection from the biggest cause of air tool wear and failure on job sites today. The Sand Filter is the simple solution to eliminate the ingestion of sand, dirt, and debris from the air source.

Operation

The Sand Filter is designed to be mounted directly on the air inlet to the tool. This provides protection when the air tool is disconnected from the air supply. For maximum air tool protection we recommend that the Sand Filter be used in conjunction with the Pneumatic Accessories Inline Lubricators.

Materials of Construction

Body Zinc Plated Steel
Insert .. 80-mesh Stainless Steel Screen

Specifications

Port Threads ... Inlet: 1/4" FNPT / Outlet: 1/4" NPT
Inlet: 3/8" FNPT / Outlet: 3/8" NPT
